

PAPERLESS APPLICATION CASE STUDY

Challenge:

New school policy requires students seeking federally funded internships undergo background check prior to working with a company. The school past vendor required the school to submit background check requests through fax and wait up to one week prior to receive results via fax. The long turnaround time jeopardized students' ability to secure internship opportunities in a timely manner.

Solution

KENTECH provided an easy to use paperless system that addressed student screening requirements.

Results

The school now receives results online fast within 48 hours of ordering allowing students to begin internship projects much quicker.

REDUCED RISK DROPS RIGHT TO THE BOTTOM LINE.
