

## **SEAMLESS INTEGRATION CASE STUDY**

### **Challenge:**

Current background checking solution requires tedious and laborious process of manually checking results of records of both those with hits and without hits.

### **Solution**

KENTECH proposed CLEAR an easy to use flagging pass/fail system that reduce the need to look at every record result manually thus allowing no hits 'pass' record to proceed quicker with the intake procedure saving time and dedicated man hours.

### **Results**

CLEAR Tenant® design solution enabled a customized integration of our screening services and their proprietary HRMS technology for significant time and cost savings.
